

Crassula closiana

Commonly: No Common Name

Vascular Plant Family: Crassulaceae

Flowers in spring

Crassula closiana is an erect annual herb to 5cm tall with opposite green leaves 2-5mm long and 1-2mm wide.

The inflorescence is a flat-topped group of clusters. The white flowers are stalked up to 1cm long with 4-5 fleshy sepals up to 2mm long. The sepals have minute warts near the tips. There are 4-5 white petals up to 2mm long.
