

Eucalyptus rudis* subsp. *rudis

Commonly: Flooded Gum

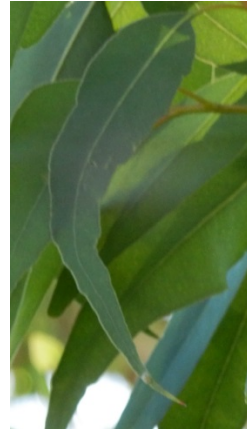

Vascular Plant Family: Myrtaceae

Flowers winter and spring

Eucalyptus rudis subsp. *rudis* is a tree up to 20m tall. It is found fringing swamps and water courses.

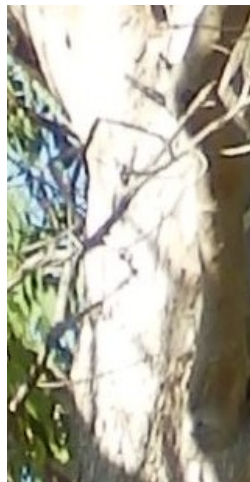

The leaves are up to 120mm long and 30mm wide

The flowers are white, the colour arising from the numerous stamens. There are up to 11 flowers in each cluster. The buds are conical both above and below.

It has rough grey bark on the trunk and smooth grey bark on the branches.

The fruits are somewhat bell shaped up to 60 6mm long and 15mm wide. Each has 4-6 valves which extend just beyond the top of the fruit.
